MUHRATI

MESSAGE FROM THE CHAIRMAN

Mohammad Abu Taleb

Dear Reader:

our mission is simply put in one sentence, that is to shorten the distance between client's vision and reality. At Muhirati, we do the right things, in the right ways, for the right reasons, All of the time - this is Muhirati's Way.

Our core values help us pursue our vision to be among the most successful, Sustainable & responsible companies in the MENA area. Ethics are one of those values - it guides our actions & decision making process & is a constant reminder of what we believe in & how we operate. Our core values stem from the pure breed arabian mare, its intelligence for planning, its courage as an example of our bias towards action & nobility to assure our clients satisfaction.

By embracing the spirit of the mare, we set a compass for our actions, positive or negative, & determine our company's culture & reputation. That's our way to understand the importance of identifying the right things to do and take the initiative towards monumental actions that thrive on mutual benefit. Our code of conduct serves as a compass for how we conduct ourselves everyday and helps us successfully navigate prospourse projects. It promotes a culture where we are confident that the impossible is indeed achivable

We belive in operating with integrity and transparency in our decisions making. these values help foster a safe & engaging work place that positively influences our internal relations, our customers, suppliers, shareowners & the communities where we live and work.

One of our main goals is to provide everthing modern & new that is decoration related & to further research for new technologies that would satisfy the desires of our clients & ours, & to stay on track of developmention & critical thinking which would ignite a new idea or develop a new research that would inspire a new product

Our code of conduct serves as a compass for how we conduct ourselves everyday and helps us successfully navigate prospourse projects. It promotes a culture where we are confident that the impossible is indeed achivable in every project we take on, we try to conquer new boundaries & bridge ambitions with realities. we take pride in the client's trust to map in every single piece to its inch perfect place. Muhirati is & will always be looking to serve our clients a high satisfactory experience by providing the highest & most cost efficient quality.

Muhrati's launch in 2022 is its commitment statment to deliver modern & high quality decorations that are made from all natural materials & to use the most up-to-date technologies for their installation & maintainance. Our technicians & engineers are eager to prove their skillfulness by applying their innovative & creative ideas to set Muhirati to compete in world-class level.

ABOUT MUHRATI'S PRODUCTS

Flexible stone veneers have been used in a number of unique & distinct applications. Architectural uses include building facades, Interior walls, Flooring, Columns, Shower walls & much more. It is an attractive addition to many decors due to the products ease of installation & the ability to apply the product in areas where stone or masonry previously wouldn't have been considered. Stone veneers have also been used for the manufacturing of indoor or outdoor planters, Custom residential or commercial water features, and automotive, marine & RV paneling.

BENEFITS

GREEN & SUSTAINABLE

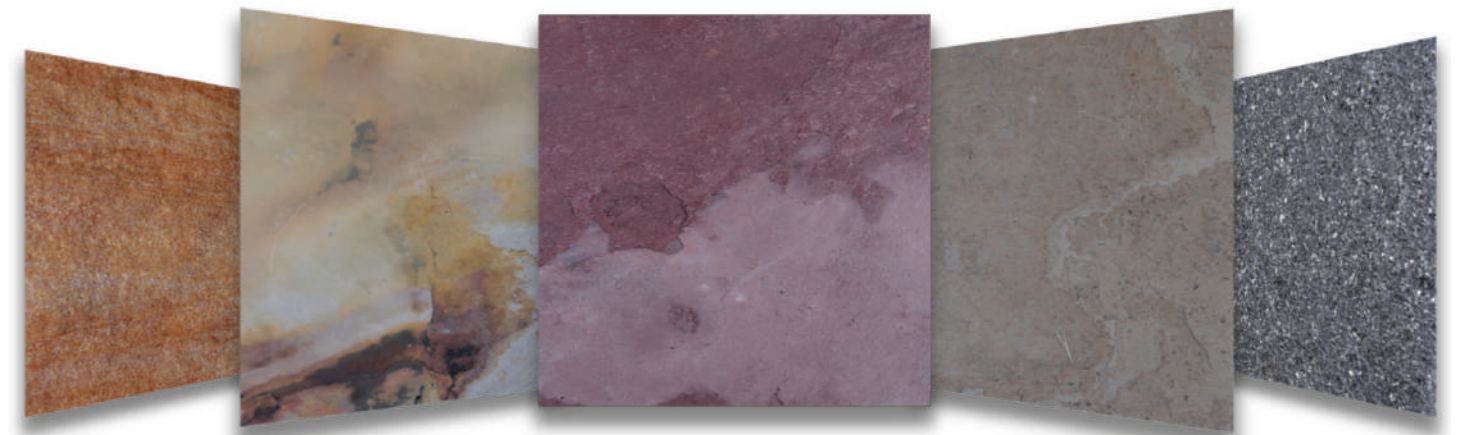

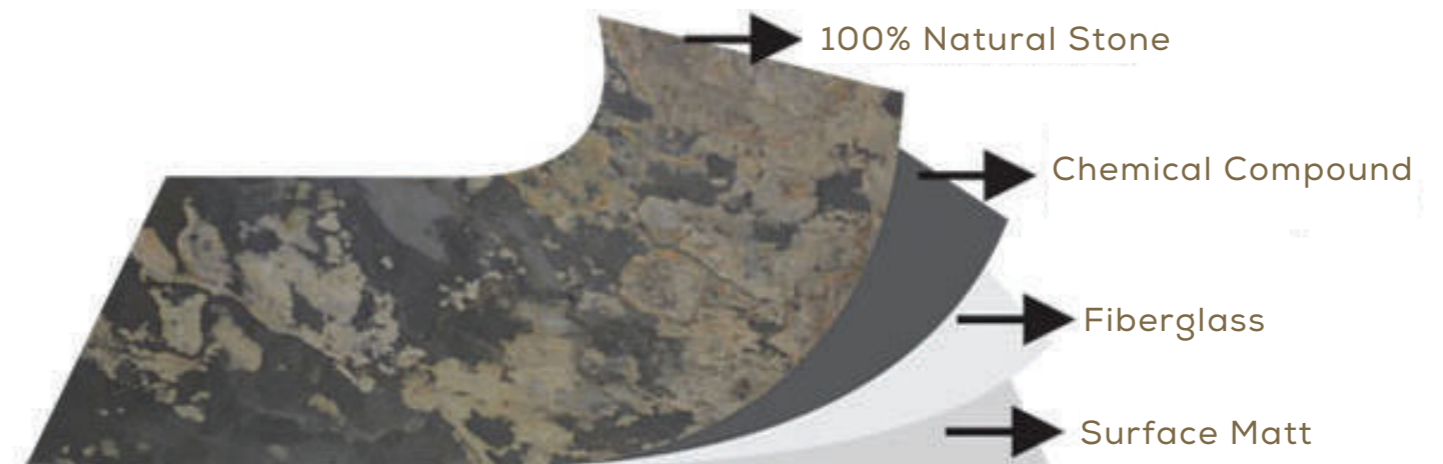

- ◆ Design Green with Veneer. Transportation cost fuel & space are saved in normal shipping and handling compared to standard stone or tile products because of its extreme lightweight - Additional savings in packaging materials are an added benefit when compared with stone or tile products. Veneer is also a Sustainable Product by utilizing only what's needed from the stone quarry. Because of the unique manufacturing process each sheet represents just a thin layer of the natural stone.

COST EFFICTIVE

real stone veneers for wall and other surface. Shipped with less cost than traditional stone, Can be bent to fit tight curves & Creates a hard moisture barrier to water and impacts. Can be cut with hand sheers for adhesion with a number of construction grade adhesives. Most standard stone or wood sealers work well & enhance colors. Saves installation labor by fast lay - up with no wet saw Easily laminated to other substrate Can be post grouted for any standard grout size Utilizing only what is needed from a stone quarry

FEATURES

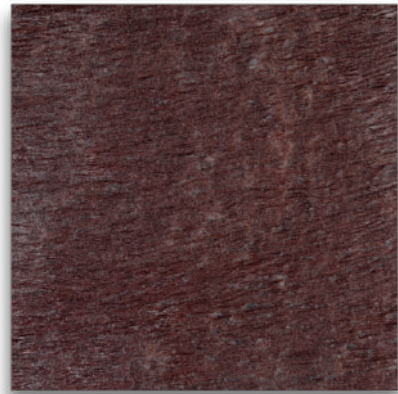

- ◆ Lightweight & green flexible Thin Fiberglass protection
- ◆ Easy cutting and adhesion
- ◆ Moisture barrier to water and impacts
- ◆ Can be bent to fit tight curves
- ◆ Sustainable, Utilizing only what is needed
- ◆ Shipped with less cost
- ◆ Large sheets save labor
- ◆ Flexible, Adaptable, Durable & weather resistant.
- ◆ Unique manufacturing process
- ◆ Unlimited application possibilities

TRANSLUCENT VENEERS

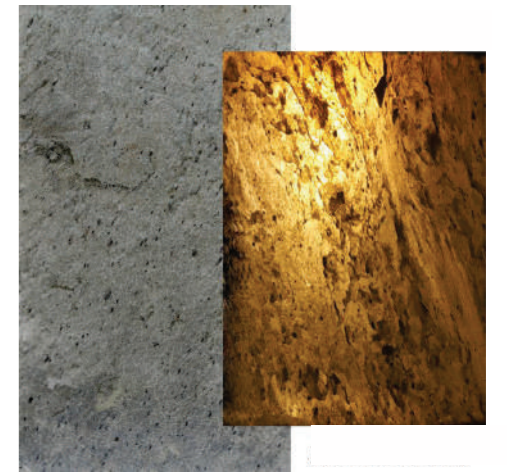

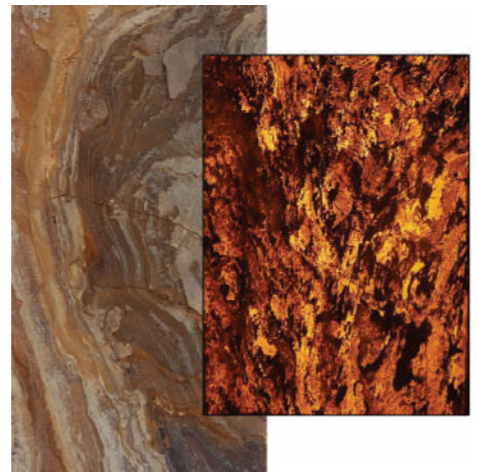

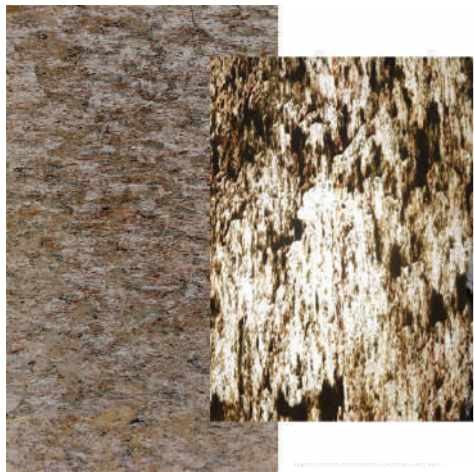

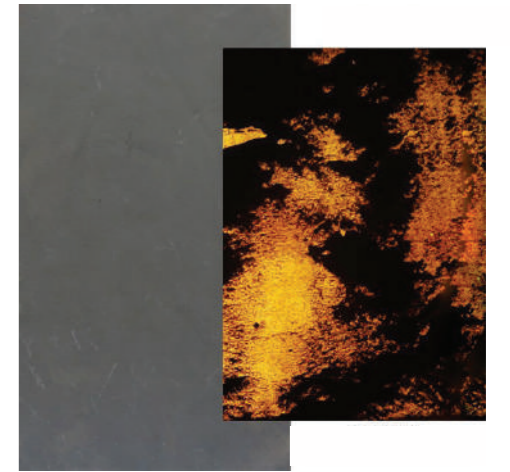

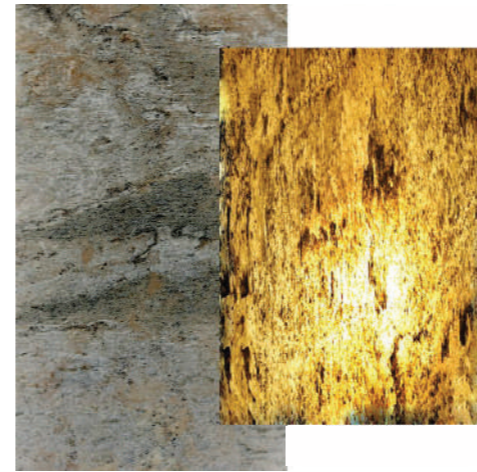

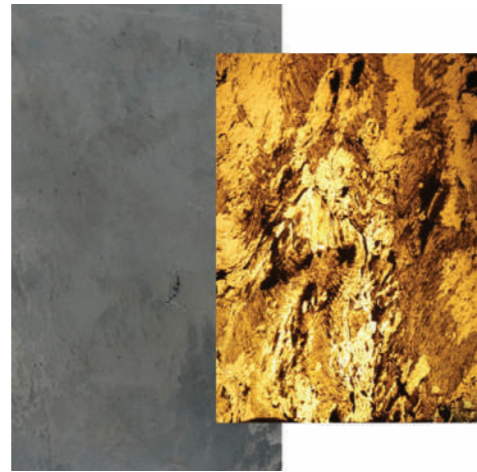

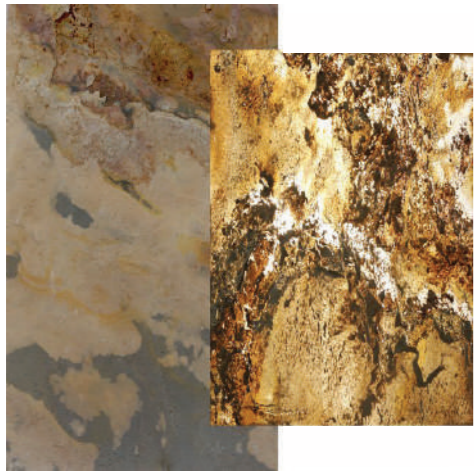

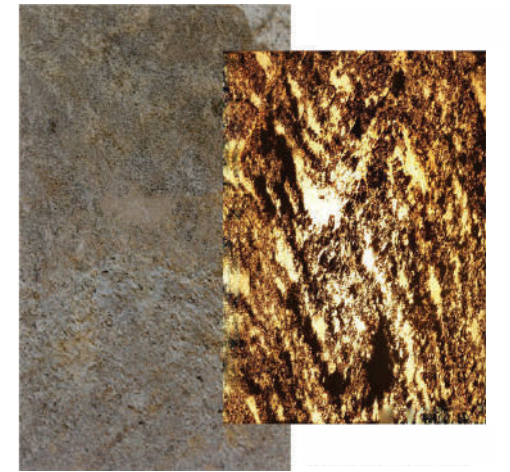

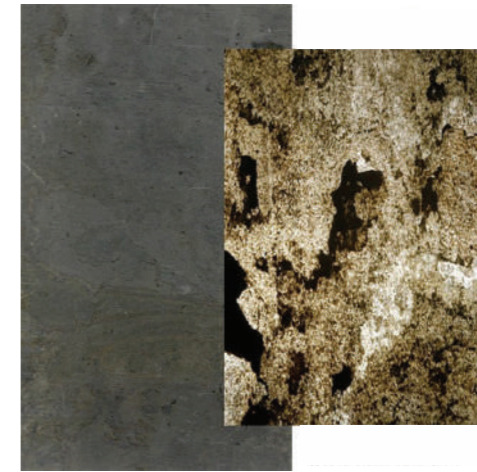

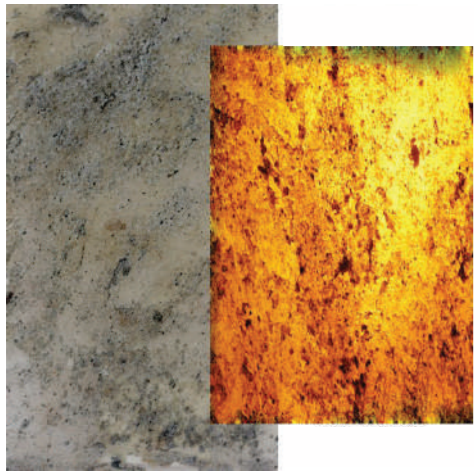

Muhrati's translucent veneers can be backlit for stunning, colorful effects & is engineered with a thin layer of real natural stone laminated to a Translucent fiberglass/polyester resin backing. Lightweight and very flexible sheets allows light to pass through for unlimited design possibilities utilizing the texture, natural color and beauty of stone.

When back-lighting is used on panels fabricated from these stones, their ability to transmit light gives them a luminous appearance. Illumination also reveals the subtle details of the complex patterning found in these extraordinary stones.

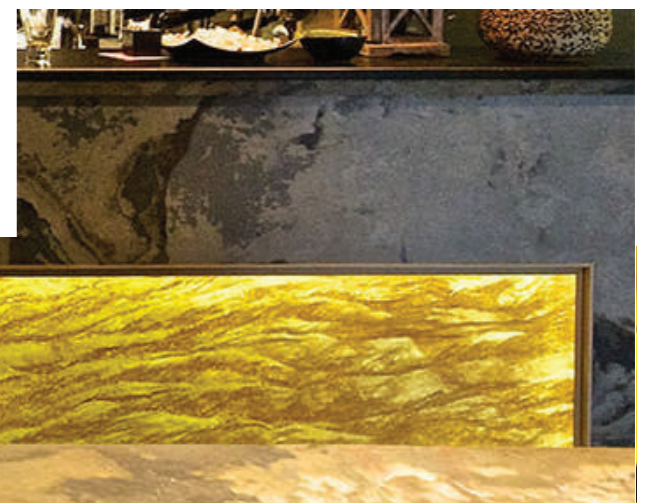

Translucent stone panels by Muhrati are suitable for many applications, and back-lighting ensures they will be brilliant and radiant focal points regardless of where they are placed on Bar Tops, Ceilings, Columns, Counters, partitions etc.

TRANSLUCENT VENEERS

TRANSLUCENT VENEERS APPLICATIONS

INSTALLATION GUIDE

Stone Veneer can be used the same way thin laminate type products are used. It will bend to a minimum radius depending on the stone color or type before cracking. With the assist of heat smaller radii can be achieved. Testing should always be done prior to any installation. It can be arched or bent inward or outward to meet a given look or architecture. Fiberglass strand are used in the makeup of Stone Veneer which gives it strength and flexibility.

PREPERATION

Prior to application it is best to clean, brush & degrease any surface of dust or oils. Depending on the adhesive used, it may be necessary to prep the back of the Stone Veneer by sanding or scuffing the back to expose the fiberglass. Some adhesives may require the use of solvents or recommended primer by the adhesive manufacturer. A preliminary dry fit of veneers allows for arrangements and orientation of individual sheets, Patterns, Textures & colors before final placement. It is recommended that each sheet be dry fit exactly where it will be placed on all surfaces.

TILING, GROUTING & JOINING

Veneer can be also be used to create a tiled effect by leaving a grout joint between cut pieces. Sheets may also be but joined for a minimal seam look.

CUTTING

Veneer can be cut with tin snips, A metal shear, Wet saw or table saw with carbide blade. Cutting curves is best done using long nosed tin snips.

INSTALLATION GUIDE

ADHESION

All adhesives should be tested prior to any installation including consideration of moisture and temperature in the planned environment. If the application is outdoors, consider thermal expansion, it should be taken into account. Since the sheets are only a veneer it must expand and contract the same as the substrate or delamination may occur.

HAND ROLLING

A hand roller is recommended to remove air between the sheet and substrate. To properly roll out trapped air start in the middle while firmly rolling outwards to the edges. Do not press too hard while rolling as this may cause adhesive to be pushed out. Proper back-filling & good rolling techniques will result in a solid hard surface. Do not use non-catalyzing (water vapor type) cure adhesives where the substrate is a moist barrier, Non-catalyzing adhesive won't cure properly if applied between non porous materials.

SEALERS

Stone Vaneer can be sealed with the same sealers used for slate, Stone tiles & wood. There are many sealers on the market with various recommended applications. Please test any sealer for the desired luster and penetration required prior to installation.

KITCHEN CABINETS

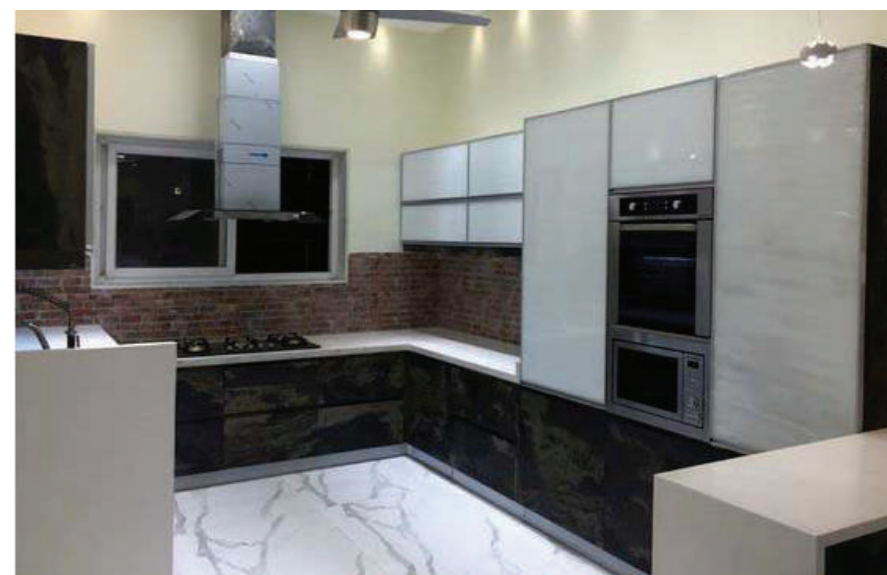

When it comes to kitchen design, stone veneer likely doesn't cross your mind. Why should it? Appliances, counter tops, cabinets, flooring, storage, and lighting are where most people spend their time. We have seen stone veneer used for almost everything and when the top designers mentioned raw materials (like natural stone) as one of the top kitchen trends we thought it was worth inspiring you too.

There are many ways to incorporate natural stone into your kitchen design but it's a matter of how much or little you would like to use. The kitchen below features Muhrati's Veneers which match the entire exterior of the house

If using natural stone is something you want to do but on a smaller scale, consider the island as a place to start. You can even also combine translucent veneers as a lighting source as well.

Q & A

◆ IS STONE VENEER REAL STONE ?

- Yes it is! Its grain, texture and colour are exact of the stone from where we it was extracted.

◆ WHAT IS THE LIFE OF STONE VENEER ?

- Normally stone lasts for life, but for practical reasons we offer a 7 year guarantee.

◆ DOES STONE VENEER CRACK ?

- No, one can use the same tools required to work with natural stone: All standard drilling, cutting and folding tools can be used with this product. As a matter of fact the tools required are much simpler and lighter

◆ HOW IS QUALITY CONTROL EXERCISED ?

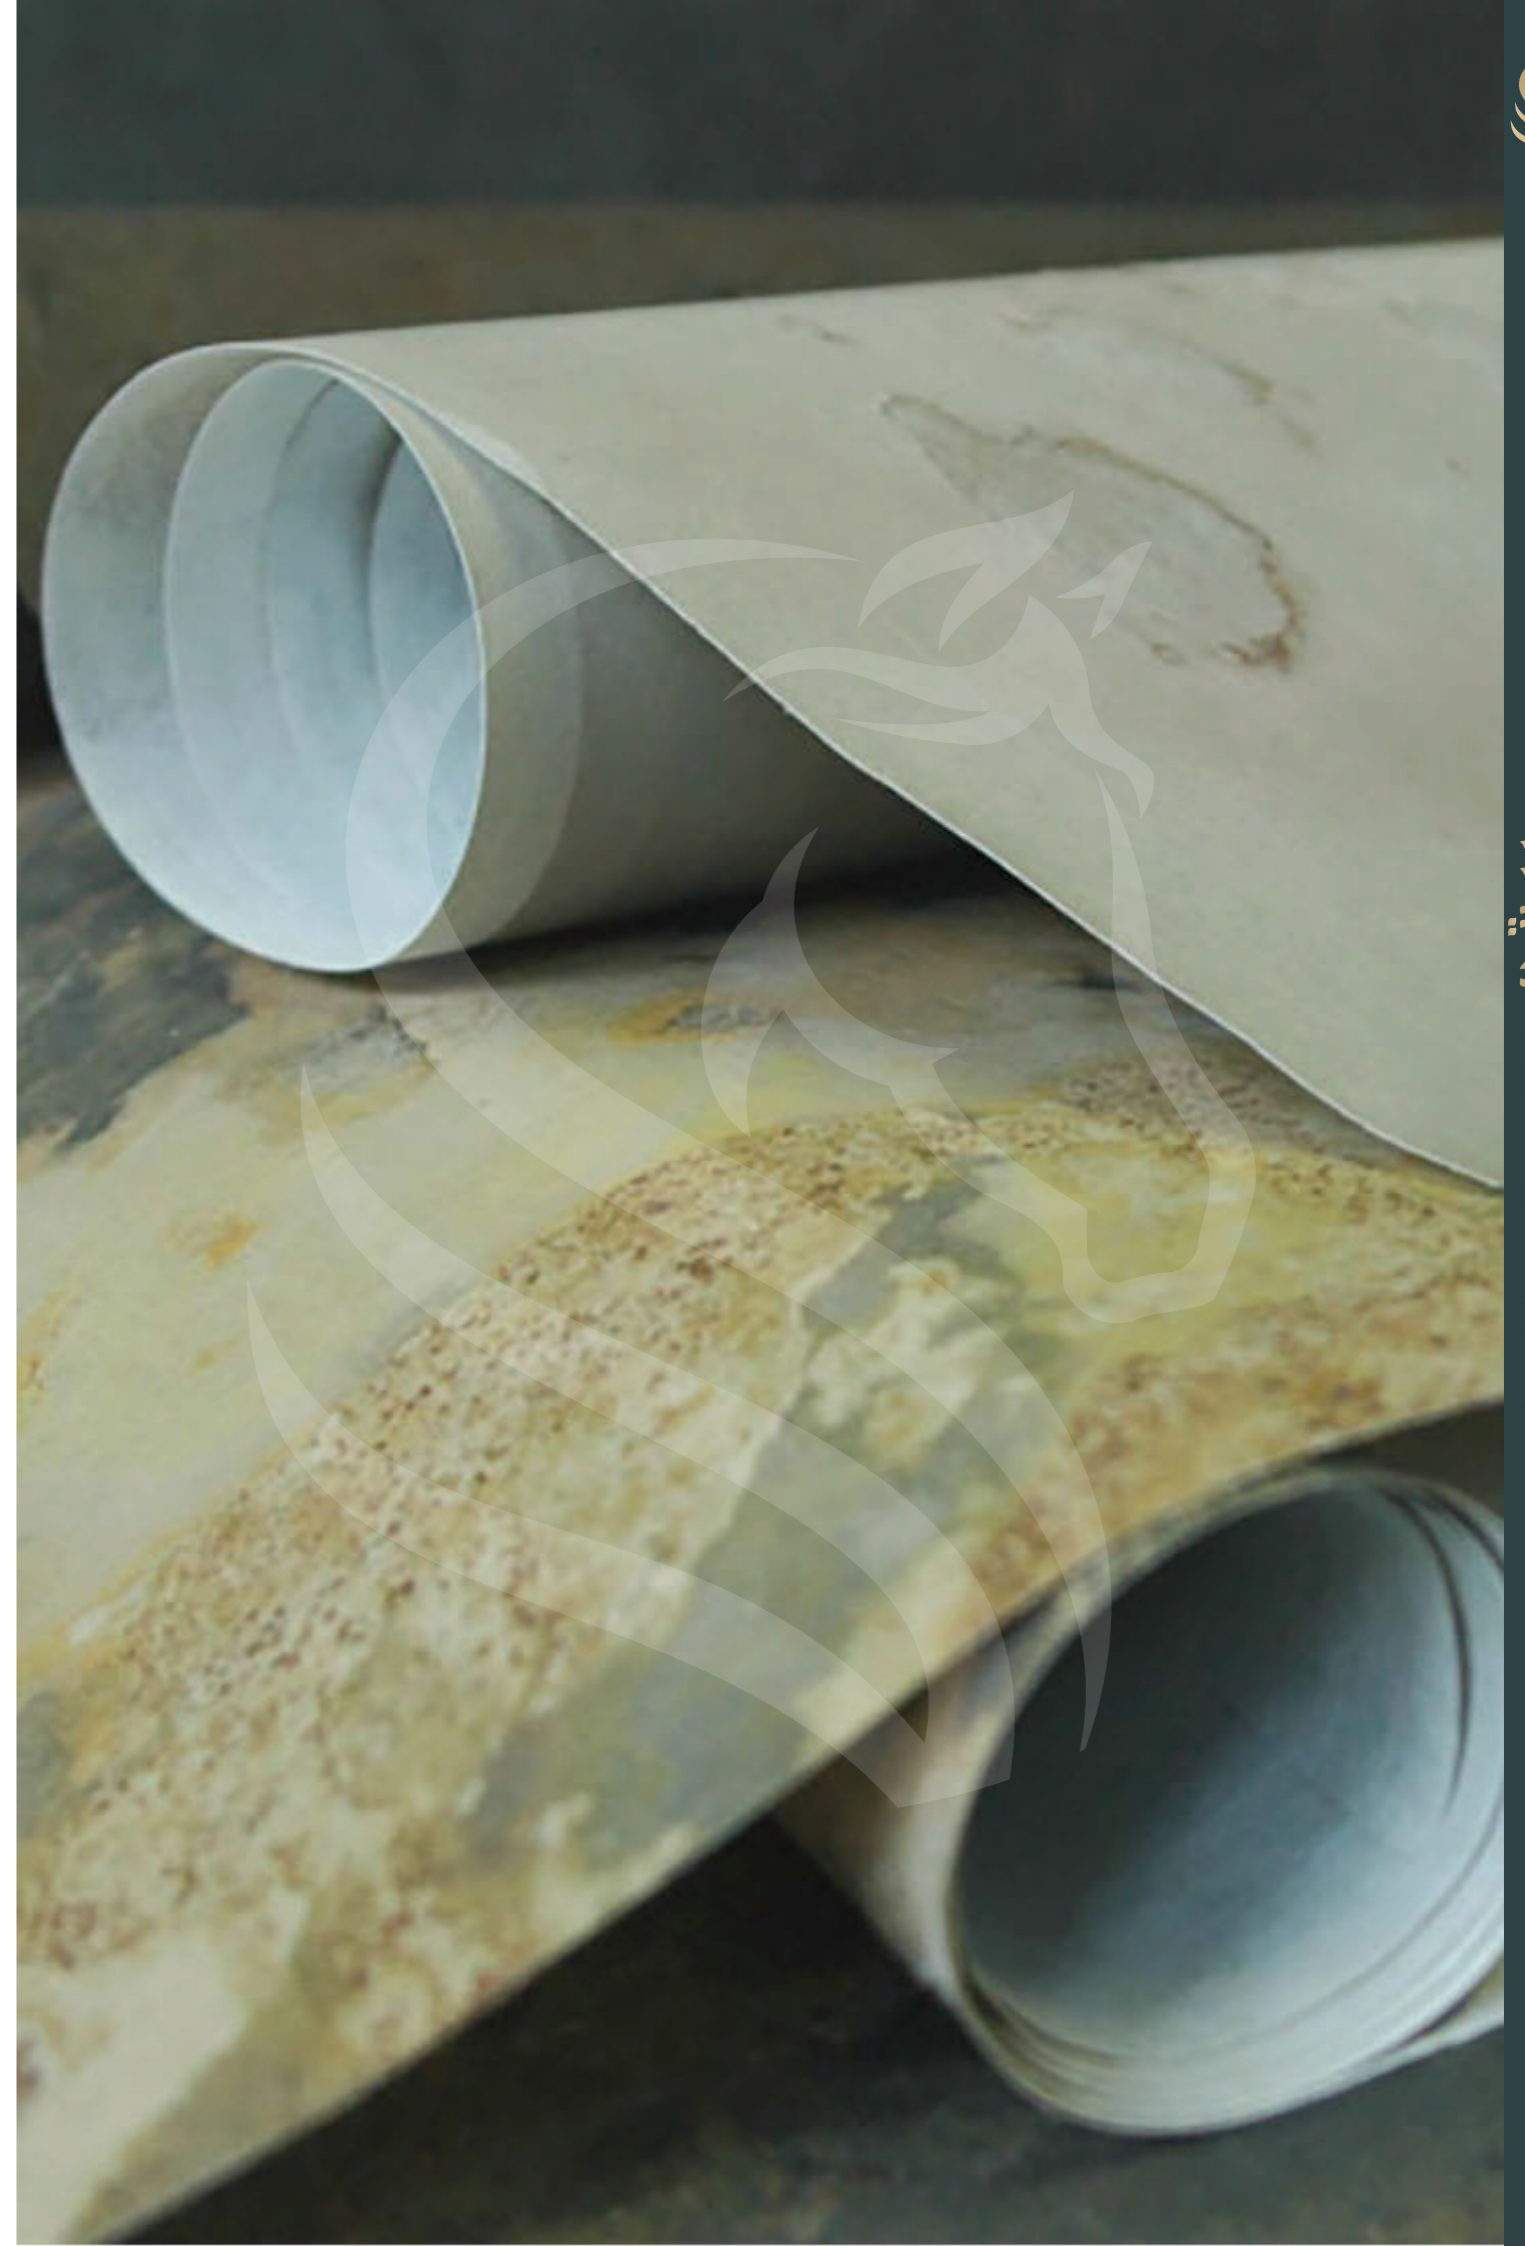

- The process of extracting stone veneers from natural stone is executed by experienced and specially trained staff and the extracted sheet undergoes visual and optical checks before storage / despatch

◆ HOW IS STONE VENEER PACKED ?

- The sheets are packed horizontally in special plywood boxes.

◆ HOW IS STONE VENEER TRANSPORTED ?

- Stone veneers can be transported both by air and sea
